

Engineering Complete Streets: Moving from Policy to Implementation

John LaPlante, PE, PTOE

Tuesday, June 11

1-3 PM

Conference Center Auditorium,
Indiana Government Center South

As more Hoosier communities commit to making streets safe and accessible for all users, we must also address the engineering and systems changes that accompany successful implementation. John LaPlante, PE, PTOE and Director of Traffic Engineering for T.Y Lin International, will share lessons learned from decades of work accommodating pedestrians, cyclists, transit riders and people of all ages and abilities in Chicago and around the country. Mr. LaPlante balances the practical and technical aspects of implementing Complete Streets policies while addressing issues such as level of service, right-of-way, traffic speeds and volume, signalization and more.

We expect to provide continuing education credits for professional engineers and certified planners.

Visit healthydesignonline.org to learn more and RSVP.

Funding for this conference was made possible (in part) by the cooperative agreement award 5U55DP003020 from the Centers for Disease Control and Prevention. The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.
